IN1805-II, 2009

Basics:

- The manual is available on Blackboard (search courses for 'ST2 Project').

- Every group has a primary assistant assigned to it:

    - Thomas Schaap (`thomas@ch.tudelft.nl`),

    - Frank Mulder (`fmuldr@gmail.com`),

    - Mark Janssen (`mark@ch.tudelft.nl`).

    The project is coordinated by Michel Meulpolder (`michel.meulpolder@gmail.com`).

- Feedback sessions are *mandatory* for everyone. Groups will shortly discuss questions, issues, and progress with their primary assistant during the afternoon.

- The final deadline (Phase V) is Friday June 05, 17:45 and is hard. Your grade will decrease with 1 point for every hour after that, so be in time. Requests for extension that have a very serious reason should be made beforehand. Excuses made afterward are not taken into account.

- The other deadlines are soft but strongly recommended to ensure overall progress. All deadlines are at 17:45.

	Date	To do/deadline	Comment
1	Wed April 08		Kick-off session
-	(Fri April 10)	(no session)	
2	Wed April 15	Phase I	
3	Fri April 17		
4	Wed April 22	Peer review	Feedback session (MANDATORY)
5	Fri April 24	Phase II	
-	(Wed April 29)	(recess)	
-	(Fri May 01)	(recess)	
6	Wed May 06		Feedback session (MANDATORY)
7	Fri May 08	Phase III	
8	Wed May 13		
9	Fri May 15		
10	Wed May 20	Phase IV	
11	Fri May 22		
12	Wed May 27		Feedback session (MANDATORY)
13	Fri May 29		
-	(Wed Jun 3)	(no official session)	
14	Fri Jun 5	Phase V + Peer review	

Meetings:

- You are expected to hold meetings, including agendas and minutes (notulen).

- There is a hard requirement to hold at least 5 meetings.

- Record an agenda and minutes. For the first meeting, an agenda is optional.

Finally, the web and uploading documents:

- Upload your code, documentation, agendas and minutes to CPM.

- Everything written is to be in English.

- Source code should be delivered in one tarball. To create one out of your source files, use `tar zcf <filename>.tar.gz *.s`

- Peer reviews are to be e-mailed to your primary assistant.

- Watch Blackboard for updates, adjusted manuals, etc.

- The best way of managing your files in a group is to use an svn server (ask the assistants). Another option is to use an online group system such as googlegroups: `groups.google.com`.
